RICHTER

How to sleep better

With our **premium mattress**, you can create the first condition for a good night's sleep. The explanation lies in the structure. This mattress allows **4 different lying positions**, so it can be adapted to individual needs.

1. The special **7-zone lamellar structure** is made of flexible cold foam. The lamellas help blood circulation and regeneration during the night.

2. One side of the mattress cover has **1 cm of gel foam** quilted into the cover. Gel foam is more flexible than memory foam and does not heat up the body. In addition, **Coolmax®** fibres are woven into the cover to transport moisture and excess body heat. The other side of the cover is high quality and quilted.

3. The core of our unique sleep system is an allergy-friendly, extremely **flexible cold foam** with good support and open pores for optimal ventilation.

4. The **2 cm thick memory foam** perfectly adapts to the shape of your body, ensures ideal pressure equalisation and stimulates blood circulation.

YOUR BENEFITS

COOLMAX®

Coolmax® is a specially designed fabric that is structurally composed of four to six channels to transport moisture more efficiently, absorbing moisture and allowing excess body heat to dissipate.

MEMORY FOAM

Memory foam side of the Richter mattress reduces pressure points and adapts to the body's shape.

REMOVABLE COVER

The cover of Richter mattresses can be removed and split in two and can be washed in a **washing machine at up to 60 degrees**.

OEKOTEX CERTIFICATION

The material used in Richter sleep supplements is certified OEKOTEX 100, which means that the product does **not contain any substances that are harmful to health**.

FOR ALL BEDS

High-quality cold foam ensures high stability. **The mattress fits all bed frames.**
