R25 and R35

Floor cleaning machines

CLEANLINESS IN PERFECTION

EFFICIENT CLEANING FOR INDOOR AND OUTDOOR AREAS

The different types of flooring have specific characteristics due to the materials used and their properties.

Carpets, wooden floors, stone floors, non-slip tiles, epoxy and rubber floors as well as PVC and laminate flooring each require different cleaning techniques.

Richter floor cleaning machines offer a professional solution for these diverse challenges and enable sustainable, **environmentally friendly cleaning with minimal use of biodegradable cleaning agents and reduced water consumption.**

INNOVATIVE TECHNOLOGY WITH OUTSTANDING CLEANING PERFORMANCE, EASY HANDLING AND MAINTENANCE

The R25/R35 floor cleaning machines are characterised by their exceptional technology, which is incorporated in the **brushes that rotate in opposite directions**, ensuring that every surface is perfectly cleaned and restored to its original beauty and condition. The water required for cleaning is distributed over the surface at the touch of a button, while the high-speed, counter-rotating brushes thoroughly scrub and clean the surface. The rotating cylinder collects the dirty water and channels it into the appliance's dirty water tank.

CLEANING OF SMALL AND LARGE AREAS

The **R25 floor cleaning machine** was developed for cleaning narrow, segmented areas and offers a faster, more efficient and more effective alternative to conventional mopping.

After treatment, the surface remains significantly drier and can be used again more quickly than with conventional cleaning techniques. The inclined handle enables **comfortable cleaning under furniture with a height of only 14 cm**. Thanks to the special front brush position, the appliance can also easily reach wall areas.

POWERFUL CLEANING FOR WORK AND DOMESTIC ENVIRONMENTS

The **R25 floor cleaning machine** with a brush width of 25 cm is **ideal for home use and for cleaning hotel rooms, restaurants, bars, shops and doctors' surgeries as well as for surfaces in corridors**. Thanks to its compact size and easy dismantling, it can be moved effortlessly from one place to another and can even be stored in the boot of a car.

The **R35** is also easy to transport. With its wider 35 cm brush, it is ideal for floor care and cleaning in **healthcare facilities, larger offices, conference rooms and sports facilities as well as for large areas in hotels and restaurants**.

WHY SHOULD YOU CHOOSE THE R25/R35 FLOOR CLEANING MACHINES?

EFFICIENT ON ALL SURFACES

- Concrete
- Synthetic resin
- Sandstone
- Marble, granite
- Wood
- Stone
- Terracotta
- Laminate flooring
- Fire bricks
- Linoleum
- Carpets
- Tatamis, training mats
- Especially recommended for cleaning joints and other structured floor surfaces

REPLACEABLE BRUSH

Thanks to their design and the mechanics of the appliance, the rotating brushes clean every surface and recess in the floor perfectly. Depending on the floor covering, a selection of different brushes is available, which can be replaced quickly and easily.

Richter floor cleaning machines offer the optimum solution for daily floor care with water through to heavy-duty and intensive cleaning with cleaning agents.

Brushes	Description	Surfaces
	<p>Universal brush kit with medium-hard bristles, supplied as standard with the floor cleaner.</p>	<p>Suitable for most surfaces: porcelain tiles, ceramic, linoleum, PVC flooring, aluminium flooring, laminate parquet flooring.</p>
